

**THE SERIES 1800 ENCLOSED  
SWITCH IS DESIGNED FOR  
DEMANDING USAGE IN  
AIRCRAFT, MEDICAL AND  
INDUSTRIAL CONTROLS AND  
INSTRUMENTATION,  
ELECTRONIC EQUIPMENT  
AND CRITICAL ORDNANCE  
APPLICATIONS.**

The 1800 Series meets or exceeds applicable requirements of MIL-DTL-3786 Style SR20. Certified test reports available on request.

The 1800 Series is designed for low level current (10 mA) @ (30mV) DC or peak AC, as well as standard ratings. It is available with either solder lug or printed circuit terminals.

## The Innovative Switch Company

The ultimate in a one-half inch rotary selector switch, the Cole series 1800 is engineered to meet or exceed applicable MIL-DTL-3786, style SR20 requirements. A QPL version is also available. Tested per MIL-STD-202 as follows:

- THERMAL SHOCK PER MIL-STD-202; METHOD 107, TEST CONDITION "B"
- VIBRATION PER MIL-STD-202; METHOD 204, TEST CONDITION "B"
- MEDIUM SHOCK PER MIL-STD-202; METHOD 213
- HIGH SHOCK PER MIL-STD-202; METHOD 207
- MOISTURE RESISTANCE PER MIL-STD-202; METHOD 106
- EXPLOSION PROOF PER MIL-STD-202; METHOD 109
- SALT SPRAY PER MIL-STD-202; METHOD 101, CONDITION "B"

The series 1800 is available with 1 pole, 2-10 positions and 2 pole, 2-5 positions. Available in standard solder lug or PC terminals, the Cole Series 1800, with its unique design, renders the switch resistant to water, contaminants, and most solvents.

Quality construction, using materials that meet the strictest standards, allows these subminiature switches to combine high current switching capacity with constant low contact resistance. Exceedingly stringent inspection and testing procedures ensure long life and high reliability. QPL Rated switching life of 25,000 cycles.

## 1800 SERIES Half Inch Enclosed Rotary Switches

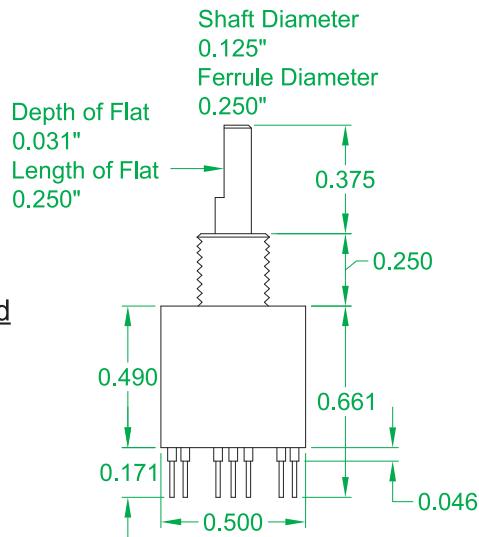

The full QPL'd MIL switch is commercially available, as are all these configurations:

- M1800 Standard (page 18)
- 1800 Standard Solder Lug Terminals (page 4)
- 1800 Standard 0.250 inch dia. shaft (page 5)
- 1800 Standard Screwdriver shaft (page 4)
- 1800 Standard 0.250 screwdriver shaft (page 5)
- 1800 Push/Pull (page 6)
- 1800 Spring Return (page 8)
- 1800 Condensed body (page 14)
- C1800 Plastic Housing (page 15,16)

| Cole Basic Switch Number             |    |    |         |

18 36 -1 04 -CPS

is a Part Number for a 1800, 1/8" dia. shaft, 36° indexing, 1 pole per deck, 4 positions per pole, shorting contacts shaft and panel seals, and PC terminals.

18 45-2 02 -GQ

is a Part Number for a 1800, 1/4" dia. shaft, 45° indexing, 2 poles per deck, 2 positions per pole, non-shorting contacts, RFI-EMI shielding, and solder lug terminals.

#### OPTIONS

The following options can be added to the standard switch. When ordering, simply add the letters after the basic part number. Options listed in alphabetical order only.

A = Adjustable stops.

C = Printed circuit mounting terminals.

SD = Screwdriver shaft.

F = Fixed stop between the first and last position on a full-turn switch.

G = RFI-EMI shielding.

P = Panel and shaft seals.

Q = 1/4" diameter shaft.

S = Shorting type switch (36° Only)

T = Pre-tinned terminals.

Y = Non-turn washer.

# 1800 SERIES

## Half Inch Enclosed Rotary Switches

### 1800 SERIES PULL/PUSH

#### ORDERING INFORMATION

Begin by identifying the switch using the COLE part numbering system as shown:

Indicate this is a SPECIAL switch to ensure that no error is made when the order is entered.

Sample part number:

**SPECIAL**  
1836 - 205 - S (See Standard Code, Page 7)  
STOP1PS2PS3PS4 5STOP

This sample part number orders a series 1800 standard style switch, 36° indexing, 2 poles, 5 positions per pole shorting, and push-to-turn isolation posts between positions 1-2, 2-3, and 3-4.

Although somewhat long, use of this numbering scheme will prevent error in orders processing. Upon receipt of your order, a special number will be issued unique to this switch. These numbers will not relate to the coding system and will be logged as "special". The acknowledgment of your order will identify this number. Your specific switch will be the only one identified by this number. Contact Cole for price.

# 1800 SERIES

## Half Inch Enclosed Rotary Switches

### 1800 ISOLATED POSITION SWITCH DESCRIPTION

A special feature of rotary switches is available known as "isolated position". This feature allows switch shaft rotation that requires the user to either pull or push the shaft before it will respond to rotational torque. The user identifies the position or positions affected by the isolation mechanism.

Incorporation of the isolated position feature in COLE'S SERIES 1800 switches will add 0.217 inches to the length.

#### SPECIFYING POSITIONS

The Cole System for identifying isolation positions lets you perform the selection by inserting isolation posts next to the positions to be isolated. An 1800 series switch with 36° indexing and continuous rotation is shown below with no isolation position identified in the spaces between the terminals.

10\_1\_2\_3\_4\_5\_6\_7\_8\_9\_10

If you isolate positions 1, 2 and 3, the isolation post insertion points are identified by the letters PL (for actuation by pulling the shaft out), or PS ( for actuation by pushing the shaft in) as shown below:

10PL1PL2PL3PL4 5 6 7 8 9 10

This indicates that you can only get to positions 1, 2 and 3 by pulling on the shaft while all other positions can be achieved with normal rotational torque on the shaft.

if A Push positions 1 and 2 are isolated from all other position but nor from each other:

10PS12PS3 4 5 6 7 8 9 10

In this case you need to push on the shaft to get to position 1 from position 10 as well as position 2 from position 3. However, to get from position 1 to position 2 merely requires rotate the shaft from position 1 to 2 or 2 to 1.

As a special feature, certain positions on the switch can be isolated in unidirectional mode. That means that the positions can be achieved with normal rotation on the shaft, but requires a push or pull action to get to the next position (Ramp-In). Conversely, reaching the isolated position with a push or pull action on the shaft but requiring normal rotation (Ramp-out) for the next position, is also available. Please contact the factory for special features.

#### SPECIFYING STOPS

Stops must be incorporated when a switch has multiple poles or specifies less than the numbers of positions available. If a switch with 36° indexing is specified as an 8 position switch with position 1 isolated with push actuation required, the designation would be:

STOP1PS2 3 4 5 6 7 8STOP

Since the stop mechanism is inserted between positions 10 and 1, the isolation post is only required between positions 1 and 2. The stop mechanism inserted between terminals 8 and 9 serves to limit the switch to 8 positions. When stop and isolation mechanism are used in multipole switches, all poles are slaved to the first pole in the case of a 2 pole, 10 position switch with 36° indexing, isolating position 1 will automatically isolate position 6 too. (Refer to the standard switch schematics for 36° indexing switches, page No. 4)

# 1800 SERIES

## Half Inch Enclosed Rotary Switches

### 1800 SERIES SPRING RETURN

**NOTES:**

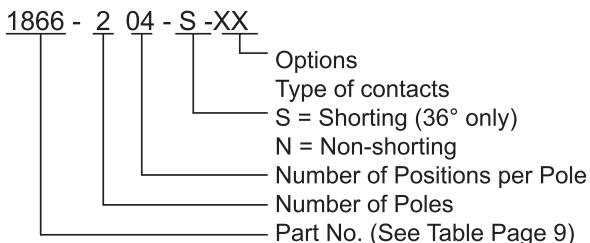

1. Dimensions are in inches.
2. Unless otherwise specified, tolerances are  $\pm 0.005$  and  $\pm 3^\circ$  on angles.
3. Shaft flat opposite position being made.
4. Switches are provided with a full circle of terminals, regardless of the number of activate positions.
5. Spring return life-cycle is 15,000 momentary cycles for the 1800 form factor.

**DESCRIPTION:**

A spring return rotary switch requires that manual torque be maintained at the desired switch position. Releasing the force allows the spring to return the contact to a normal, or detent positions. Arrows in the CONFIGURATIONS AND RESTRICTION TABLE indicate the direction the spring will return the contact so it assumes a normal detent position. The "D" designates a normal detent position. (See Table Page 9).

**ORDERING INFORMATION**

Create the part number using this example:

This sample part number orders a series 1800 switch with 36° indexing, momentary terminal 4 returning to terminal 3 (9 to 8 is slaved), 2 poles, 4 positions/pole, shorting contacts with options available as shown in the Table Page 9.

**OPTIONS**

The following options can be added to the standard switch. When ordering, simply add the letters after the basic part number. Options listed in alphabetical order only.

C = PC terminals

G = RFI-EMI shielding.

P = Panel and shaft seals.

Q = 1/4" O/A shaft

SD = Screwdriver slot.

T = Pre-tinned terminals

Y = Non-turn washer.

# 1800 SERIES

## Half Inch Enclosed Rotary Switches

### 1800 SPRING RETURN ROTARY SWITCH DESCRIPTION

A rotary switch with a spring return mechanism allows certain selected positions to have momentary action wherein they can be maintained only with positive force on the shaft. Releasing the shaft will return the switch to its previous position. This feature is available in the COLE SERIES 1800, 1830, and 3600 switches.

Addition of this mechanism to the SERIES 1800 switch adds 0.217 inches to its length; all other dimensions remain unchanged.

The spring return feature in the SERIES 1800 switch is available in those with 36° and 45° angles of throw as a standard.

Custom requirements can be accommodated by contacting the factory.

### CONFIGURATIONS AND RESTRICTIONS TABLE

| INDEXING          | Part No. | Switch Action | No. of poles | Position Per Pole | Terminal Opposite to Flat |
|-------------------|----------|---------------|--------------|-------------------|---------------------------|
| 36° SPRING RETURN | 1859     | 1->2          | 1 or 2       | 2                 | 2                         |

# 1800 SERIES

## Half Inch Enclosed Rotary Switches

### 1800 CONDENSED SERIES

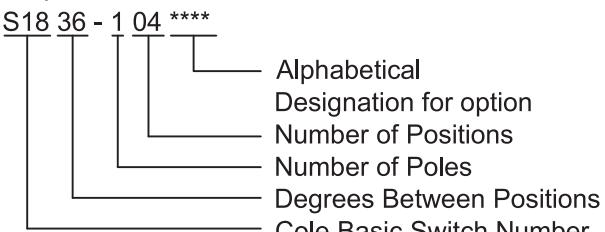

#### NOTES:

- Dimensions are in inches.
- Unless otherwise specified, tolerances are  $\pm 0.005$  and  $\pm 3^\circ$  on angles (Non-accumulative).
- Shaft flat angle A is the angle between a line through the center of the shaft, perpendicular to the mounting bushing flats and another line through the center of the shaft and perpendicular to the shaft flat, with switch in position number 1.
- Position 1 and terminal 1 coincide.
- Dimension shown are typical for all angles of throw, unless otherwise specified.
- Screwdriver actuation - S1800 Series switches can also be supplied with a slotted screwdriver shaft. The shaft dimensions are indicated; all other dimensions remain the same. The slot in the shaft lines up with the point of contact of Pole number one.

#### ORDERING INFORMATION

##### Sample Code:

The standard Series S1800 is furnished with solder lug terminations, non-shorting and without seals. The standard 10 position switch is continuous rotation.

#### OPTIONS

The following options can be added to the standard switch. When ordering, simply add the letters after the basic part number.

- A = Adjustable stops
- C = printed Circuit mounting terminals
- F = Fixed stop between the last and first position on the 10 position switch.
- P = Panel and shaft seals.
- S = Shorting type switch ( $36^\circ$  only).
- SD = Screwdriver slot.
- Q = 1/4" shaft
- T = Pre-tinned terminals
- Y = Key Washer

C18 36 - 1 04 - \*\*\*\*

Alphabetical Designation for options  
Number of Positions per Pole  
Number of Poles per Deck  
Degrees Between Positions  
Cole Basic Standard Switch

**OPTIONS**

The following options can be added to the standard switch. When ordering, simply add the letters after the basic part number. Options listed in alphabetical order only.

A = Adjustable stops.  
C = Printed circuit mounting terminals.  
SD = Screwdriver shaft.  
F = Fixed stop between the first and last position on a full-turn switch.  
P = Panel and shaft seals.  
Q = 1/4" diameter shaft.  
S = Shorting type switch (36° only)  
T = Pre-tinned terminals.  
Y = Key Washer

**PART NUMBER ORDERING EXAMPLES**

C1836-1 04-CPS

is a Part Number for a C1800, 1/8" dia. shaft, 36° indexing, 1 pole per deck, 4 positions per pole, shorting contacts, shaft and panel seals, and PC terminals.

C1845-2 02-GQ

is a Part Number for a C1800, 1/4" dia. shaft, 45° indexing, 2 poles per deck, 2 positions per pole, non-shorting contacts, RFI-EMI shielding, and solder lug terminals.

## Half Inch Enclosed Rotary Switches

### Series 1800 Technical Data

| Specification   | Unit            | Value                   | Note:  |
|---|-----------------|-------------------------|--|
| Military Specifications                                 |                 | MIL-DTL-3786 Style SR20 |  |
| Continuous (Non-Switching) Current Carrying Capacity    | Amps            | 6                       | at 28 VDC, with max. contact temperature rise of 20°C                            |
| Switching Current Capacity at 28 VDC resistive          | Amps            | 0.200                   |  |
| Switching Current Capacity at 115 VAC resistive         | Amps            | 0.150                   |  |
| Switching Current Capacity at 28 VDC inductive (2.8 H.) | Amps            | 0.030                   | at Atmospheric pressure with 85°C and at reduced Barometric pressure with 25°C   |
| Switching Current Capacity at 28 VDC Lamp Load          | Amps            | 0.100                   |  |
| Low Level max. capacity                                 | mA              | 10                      | at 30 millivolts DC max.   |
| Dielectric Strength, min.                               | VRMS            | 600                     |  |
| Contact resistance, max. (initial)                      | milliohms (mΩ)  | 10                      |  |
| Contact resistance, max. (after life)                   | milliohms (mΩ)  | 20                      |  |
| Insulation resistance, min. (initial)                   | megaohms (MΩ)   | 50,000                  | at 100 VDC   |
| Insulation resistance, min. (after life)                | megaohms (MΩ)   | 25,000                  | at 100 VDC   |
| Switching Life  | cycles          | 25,000                  | at rated loads, sea-level, 25°C, 68% relative humidity                           |
| Mechanical Life   | cycles          | 25,000                  |  |
| Spring Return Life                                      | cycles          | 15,000                  | for momentary cycles   |
| Rotational Torque, min.                                 | inch ounces     | 8                       |  |
| Rotational Torque, max.                                 | inch ounces     | 24                      |  |
| Stop Strength, max.                                     | inch pounds     | 7.5                     |  |
| Mounting Ferrule Strength                               | inch pounds     | 15                      |  |
| Withstanding Shaft Push Force                           | pounds          | 100                     |  |
| Weight  | grams           | 13                      |  |
| Molded Parts  |                 | thermoplastic           |  |
| Contact Surfaces  |                 | Gold plated             |  |
| Altitude  | feet            | 70,000                  | typical pressure at 70,000 feet: 0.64 psi  |
| Temperature, min.                                       | degrees Celsius | -65                     |  |
| Temperature, max.                                       | degrees Celsius | 85                      |  |
| Vibration Tested  |                 | Meets                   | Per MIL-DTL-3786, MIL-STD-202, Method 204, test condition "B", vibration grade 3 |
| Impact Shock, Medium                                    |                 | Meets                   | MIL-STD 202; Method 213  |
| Impact Shock, High                                      |                 | Meets                   | at 100g, MIL-STD 202, Method 207   |
| Moisture Resistant                                      |                 | Meets                   | MIL-STD 202; Method 106  |
| Salt Spray Resistant                                    |                 | Meets                   | MIL-STD 202, Method 101, Condition "B"   |
| Explosion Proof   |                 | Meets                   | MIL-STD 202, Method 109  |
| Immersion   |                 | Meets                   | 3 feet water, MIL-STD-202, method 104, test condition C                          |
| EMI/RFI   |                 | Meets                   | MIL-DTL-3786, 2 ohms Shaft to ground max.  |
