

High Performance Amplifier, 10 dB Gain 5 - 500 MHz

AM-123/AMC-123
V3

Features

- 3.5 dB Typical Midband Noise Figure
- +42 dBm Typical Midband Intercept

Description

M/A-COM's AM-123 is a coupler feedback amplifier with high intercept and compression points. The use of coupler feedback minimizes noise figure and current in a high intercept amplifier. This amplifier is packaged in a TO-8 package. Due to the internal power dissipation the thermal rise is minimized. The ground plane on the PC board should be configured to remove heat from under the package. AM-123 is ideally suited for use where a high intercept, high reliability amplifier is required.

2. All specifications apply when operated at +15 VDC, with 50 ohms source and load impedance.

3. Heat Sinking: Operation at case temperature above 95°C is not recommended. Heat sinking adequate to dissipate 1 W must be provided in use.
