Description

CD4008BMS types consist of four full adder stages with fast look ahead carry provision from stage to stage. Circuitry is included to provide a fast "parallel-carry-out" but to permit high-speed operation in arithmetic sections using several CD4008BMS's.

CD4008BMS inputs include the four sets of bits to be added, A1 to A4 and B1 to B4, in addition to the "Carry In" bit from a previous section. CD4008BMS outputs include the four sum bits, S1 to S4. In addition to the high speed "parallel-carry-out" which may be utilized at a succeeding CD4008BMS section.

The CD4008BMS is supplied in these 16-lead outline packages:

Braze Seal DIP	H4T
Frit Seal DIP	H1F
Ceramic Flatpack	H6W
