## Heat-Shrink Insulated Snap-Plug Terminal

Male, .156" Plug Diameter, 16-14 AWG

In stock  
\$8.42 per pack of 10  
7835K54

For Wire Size	16-14 AWG
Insulation Color	Blue
Additional Specifications	Male 0.156" Plug Diameter Heat-Shrink Insulated
RoHS	Compliant

Also known as bullet terminals, these have a round tab that saves space compared to the flat tab found on most quick-disconnects. Terminals crimp onto your wire. UL recognized and CSA certified. Male terminals are tin-plated copper.

Heat-shrink-insulated terminals have adhesive-lined nylon-like polymer insulation that shrinks when heated after crimping. It forms a strain-resistant seal that keeps out water, salt, and harsh contaminants. Minimum shrink temperature is 194° F. Rated to 600 volts and 221° F.
