

HUTSON INDUSTRIES

TRIAC'S

60 AMPERE PRESS-FIT SERIES POWER TRIACS

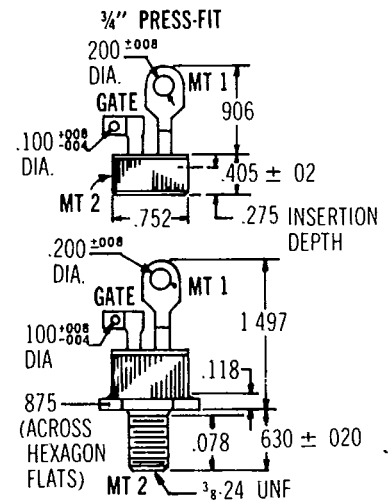

This power triac series is the result of Hutson's advanced thyristor engineering and manufacturing technology.

The 3/4" press-fit and stud-mount packages are hermetically sealed and the center-gate design results in low switching losses and improved commutating dv/dt and di/dt characteristics.

Available in 200 to 1000 V, (V_{DROM}) and 60 A RMS ratings, these devices are ideally suited for industrial applications such as solid state switches, motor speed control, heating cooling and lighting controls and other power control applications where high currents or voltages are required.

Hutson offers a complete line of triacs and SCR's in all popular package configurations from 3 Amp and 4 Amp sensitive gates to 35 Amp SCR's and 60 Amp Triacs. All Hutson 3 to 40 Amp thyristors are available in chip form.

For additional information or applications, assistance, please contact Hutson Industries.

3/4" STUD-MOUNT

ALL DIMENSIONS IN INCHES.

NOTE:

PRESS FIT DEVICES SHOULD BE INSERTED BETWEEN 1/8" AND 3/32". WITH A PRESSURE OF 800 PSI MAX THIS PRESSURE MUST BE APPLIED TO THE STEEL RING TO AVOID DAMAGE TO THE GLASS-TO-METAL HEADER SEAL.
