PACKAGE OUTLINE

## Features

- ◆ Rugged, reliable hermetic DIP package
- ◆ Performance guaranteed over full military temperature range
- ◆ High isolation voltage, 3000 Vdc
- ◆ Low input current, 0.5 mA
- ◆ Low power consumption
- ◆ High common mode rejection
- ◆ Radiation tolerant design
- ◆ High density dual-channel package

## Description

The OLH5730 and 5731 are dual-channel hermetic 8-pin DIP optocouplers for low input current applications. The OLH5731 product is a 100% hi-rel screened version of the OLH5730.

Each channel consists of an AlGaAs LED optically coupled to an integrated photodiode-split darlington detector. The AlGaAs LED provides superior low current performance. The split darlington open collector output results in high gain and low saturation voltage.

These products are functionally compatible to HCPL2730/2731, and 6N140A optocouplers.

The performance of these products under radiation environment is much better than standard phototransistors. Test data is presented in Application Note 1003.

Special low input current and CTR selections are available upon request.

NOTES:

1. Measured between pins 1, 2, 3,4 shorted together and pins 5,6,7,8 shorted together.
2. Current Transfer Ratio is defined as the ratio of output collector current,  $I_C$ , to the forward LED current  $I_F$ , times 100%.
3. Derate  $I_F$  at 0.33 mA /°C above 110°C.
4. Output power is collector output power plus total supply power. Derate at 1.66 mW / °C above 110°C

## Absolute Maximum Ratings

|   |  |  |  |  |  |                    |  |  |
|---|--|--|--|--|--|--------------------|--|--|
| Coupled   |  |  |  |  |  |                    |  |  |
| Input to Output Isolation Voltage <sup>1</sup>      |  |  |  |  |  | ± 3000 Vdc         |  |  |
| Storage Temperature Range                           |  |  |  |  |  | -65°C to +150°C    |  |  |
| Operation Temperature Range                         |  |  |  |  |  | -55°C to +125°C    |  |  |
| Lead Solder Temperature (1.6mm below seating plane) |  |  |  |  |  | 260°C for 10s      |  |  |
| Input Diode   |  |  |  |  |  |                    |  |  |
| Average Input Current                               |  |  |  |  |  | 10 mA <sup>3</sup> |  |  |
| Peak Forward Current ( $\leq 1\text{mS}$ duration ) |  |  |  |  |  | 20 mA              |  |  |
| Reverse Voltage                                     |  |  |  |  |  | 5.0 V              |  |  |
| Output Detector                                     |  |  |  |  |  |                    |  |  |
| Average Output Current                              |  |  |  |  |  | 40 mA              |  |  |
| Supply Voltage, V <sub>cc</sub>                     |  |  |  |  |  | -0.5 V to 18 V     |  |  |
