

The VC-TXO-35SM is a VC (Voltage Controlled) TCXO (Temperature Compensated Crystal Oscillator) featuring very tight stability over a wide temperature range. The small subminiature SMD ceramic package measures 3.2 x 5.0 x 1.5 mm. The voltage control has a tuning range of ± 5 ppm minimum. The low profile package is ideal for wireless communications applications.

FEATURES

- Highly stable output
- Wide temperature
- Voltage control function
