

NETCONNECT SL SERIES OUTLETS

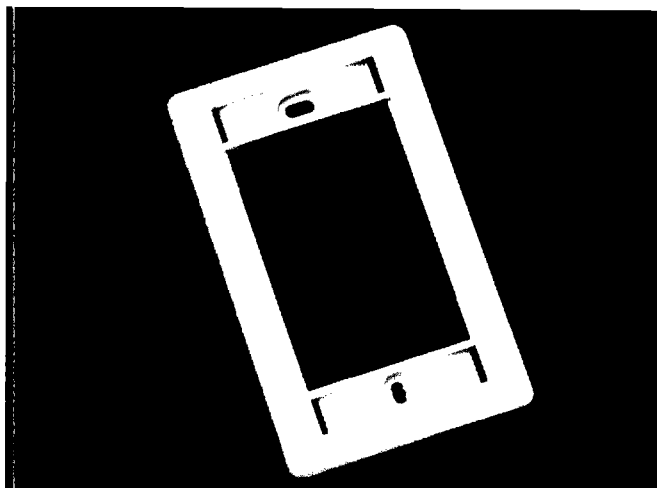

The new SL Series faceplates, jacks, and inserts offer increased flexibility and density in the work area. The faceplates use front-loading modules that snap in and out for easy access during adds, moves and changes. SL Series jacks and inserts snap into modules that are in turn snapped into the faceplate. Outlets are customized through the use of SL Series modules that are available in multiple configurations. To meet the requirements of any application, AMP offers 8-position jacks in Cat 3, Cat 5e and Cat 6 performance as well as 6-position jacks for voice, modem and internet connections. The new MT-RJ fiber optic jack may also be used, taking advantage of its small size and ease of installation. Various connector inserts are also available for A/V applications. Icons, labels and colored jacks fulfill port segregation and identification requirements to comply with TIA-606. Angled connections are yet another benefit, providing protection for connections and satisfying bend radius concerns for mating equipment cables. In addition to single gang and double gang electrical box mounting, the new SL Series also provides high-density outlets for duplex electrical faceplates, modular furniture and surface mount applications.

Product Facts

- Front-loading modules snap in and snap out for easy access
- Multimedia capabilities—RCA, BNC, F, ST, MT-RJ
- Modular approach for flexibility in configuration
- High-density on an angle—up to six jacks in a single gang faceplate
- Colored jacks, icons and labeling for TIA-606 system administration
- Multiple modules available for various configurations
- Increased density in duplex electrical faceplates, floor fittings and office boxes

AMP

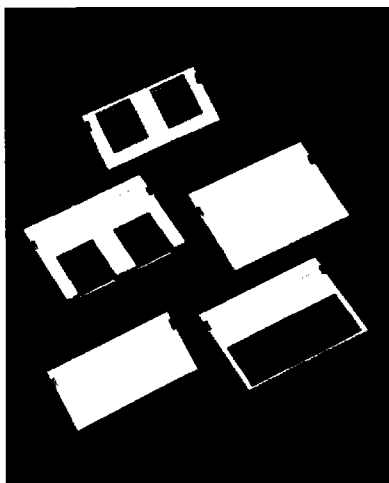

Faceplates

- Accept modules in any combination of up to 3 units
- Single and double gang
- Integrated labels and clear label covers

Description	Part Number
Single Gang Faceplate	1339118-X
Double Gang Faceplate	1339119-1

X denotes color: -1=Almond, -2=Black, -3=White, -4=Gray, 1=-1=Electrical Ivory

Modules

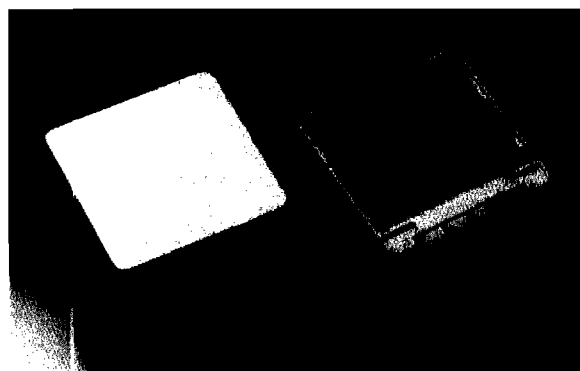

- Available in straight or angled configurations
- Angled modules protect cable connections and satisfy bend radius requirements
- Multiple port configurations
- Accept individual jacks and inserts for maximum flexibility
- Use blank modules to fill unused spaces planned for future expansion
- Front-loading—snap in and snap out easily

Description	Part Number
Blank, 1 Unit	1116410-X
Blank, 1.5 Units	1116407-X
2-Port Straight, 1 Unit	1116409-X
2-Port Angled, 1.5 Units	1116406-X
3-Port Angled, 1.5 Units	1116408-X

X denotes color: -1=Almond, -2=Black, -3=White, -4=Gray, 1- -1=Electrical Ivory
Note: 2-Port modules also accept 110Connect Jacks.

Office Box

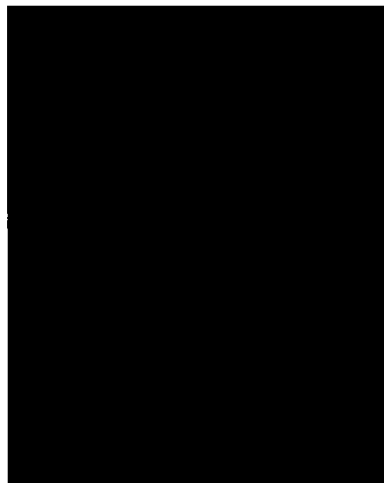

- Mount any combination of SL Series Toolless Jacks or SL Series Inserts
- Compatible with most surface raceways
- Small footprint

Description	Part Number
2-Port Office Box	1339054-X
4-Port Office Box	1339057-X

X denotes color: -1=Almond, -2=Black, -3=White, -4=Gray, 1- -1=Electrical Ivory

Mounting Strap

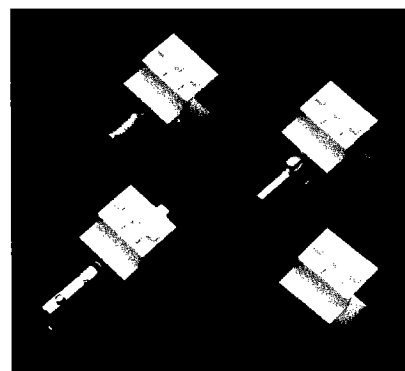

- Allows high density mounting behind standard duplex electrical outlet faceplate
- Mount any combination of SL Series Toolless Jacks or SL Series Inserts
- High-density outlet solution for poke-thru and floor fittings

Description	Part Number
4-Port Duplex Mounting Strap	1339120-X

X denotes color: -1=Almond, -2=Black, -3=White, -4=Gray, 1- -1=Electrical Ivory

Inserts

- Provide connections for different media types
- Configure faceplate to handle various services
- May be used in angled or straight modules

Description	Part Number
Blank	1116412-X
F Connector	1339121-X
ST Connector	1339123-X
BNC Connector	1339124-X

X denotes color: -1=Almond, -2=Black, -3=White, -4=Gray, 1- -1=Electrical Ivory
