TEA6300T

Sound fader control circuit

GENERAL DESCRIPTION

The Sound Fader Control circuit (SOFAC) is an I²C-bus controlled preamplifier for car radios.

Features

- Source selector for three stereo inputs
- Inputs and outputs for noise reduction circuits
- Volume and balance control; control range of 86 dB in steps of 2 dB
- Bass and treble control from + 15 dB (treble 12 dB) to -12 dB in steps of 3 dB
- Fader control from 0 dB to -30 dB in steps of 2 dB
- Fast muting
- Low noise suitable for DOLBY* B and C NR (noise reduction)
- Signal handling suitable for compact disc
- I²C-bus control for all functions
- ESD protected

QUICK REFERENCE DATA

| parameter | symbol | min. | typ. | max. | unit |
|---|---------------------|------|------|--------|------|
| Supply voltage | V _{CC} | 7,0 | 8,5 | 13,2 | V |
| Input sensitivity for full power at the output stage | V _{i(rms)} | — | 50 | — | mV |
| Input signal handling | V _{i(rms)} | — | 1,65 | — | V |
| Frequency response | f _r | 35 | — | 20 000 | Hz |
| Channel separation f = 250 Hz to 10 kHz | α _{CS} | 70 | 92 | — | dB |
| Total harmonic distortion | THD | — | 0,05 | — | % |
| Signal plus noise-to-noise ratio | (S+N)/N | — | 80 | — | dB |
| Operating ambient temperature range | T _{amb} | -40 | — | + 85 | °C |

PINNING

| | | |
|----|------|---|
| 1 | SDA | serial data input/output (I^2C -bus) |
| 2 | GNDB | ground for I^2C -bus terminals |
| 3 | QLR | output left rear |
| 4 | QLF | output left front |
| 5 | TL | treble control capacitor; left channel |
| 6 | BL1 | bass control capacitor; left channel |
| 7 | BL0 | bass control capacitor; left channel |
| 8 | INLA | input left source A |
| 9 | i.c. | internally connected |
| 10 | INLB | input left source B |
| 11 | ELFI | electronic filtering for supply |
| 12 | INLC | input left source C |
| 13 | QSL | output source selector left |
| 14 | INL | input left control part |
| 15 | INR | input right control part |
| 16 | QSR | output source selector right |
| 17 | INRC | input right source C |
| 18 | GND | ground |
| 19 | INRB | input right source B |
| 20 | Vref | reference voltage ($1/2 V_{CC}$) |
| 21 | INRA | input right source A |
| 22 | BR0 | bass control capacitor; right channel |
| 23 | BR1 | bass control capacitor; right channel |
| 24 | TR | treble control capacitor; right channel |
| 25 | QRF | output right front |
| 26 | QRR | output right rear |
| 27 | VCC | supply voltage |
| 28 | SCL | serial clock input (I^2C -bus) |

Sound fader control circuit**TEA6300T****FUNCTIONAL DESCRIPTION**

The source selector selects three stereo channels –RF part (AM/FM), recorder and compact disc. As the outputs of the source selector and the inputs of the main control part are available, additional circuits such as compander and equalizer systems may be inserted into the signal path. The AC signal setting is performed by resistor chains in combination with multi-input operational amplifiers. The advantage of this principle is the combination of low noise, low distortion and a high dynamic range for the circuit.

The separate volume controls of the left and the right channel facilitate correct balance control. The range and balance control is software programmable.

Because the TEA6300 has four outputs a low-level fader is included. The fader control is independent of the volume control and an extra mute position is built in for the front, the rear or for all channels. The last function may be used for muting during preset selection. An extra pop suppression circuit is built in for pop-free switching on and off. As all switching and control functions are controllable via the two-wire I²C-bus, no external interface between the microcomputer and the TEA6300 is required.

The on-chip power-on-reset sets the TEA6300 to the general mute mode.

RATINGS

Limiting values in accordance with the Absolute Maximum System (IEC 134)

| parameter | symbol | min. | max. | unit |
|-------------------------------------|------------------|------|-------|------|
| Supply voltage (pin 27-18) | V _{CC} | – | 16 | V |
| Maximum power dissipation | P _{tot} | – | 1 | W |
| Storage temperature range | T _{stg} | –55 | + 150 | °C |
| Operating ambient temperature range | T _{amb} | –40 | + 85 | °C |

Sound fader control circuit**TEA6300T****CHARACTERISTICS**

$V_{CC} = 8,5 \text{ V}$; $R_S = 600 \Omega$; $R_L = 10 \text{ k}\Omega$; $f = 1 \text{ kHz}$; $T_{amb} = 25^\circ\text{C}$; test circuit Fig. 10; unless otherwise specified

Notes to the characteristics

1. The indicated values for output power assume a 6 W power amplifier with 20 dB gain, connected to the output of the circuit. Signal-to-noise ratios exclude noise contribution of the power amplifier.
2. Signal-to-noise ratios on a CCIR 468-2 average meter reading are 4,5 dB better than on CCIR 468-2 quasi peak.

Sound fader control circuit**TEA6300T****I²C-BUS FORMAT**

| | | | | | | | |
|---|---------------|---|------------|---|------|---|---|
| S | SLAVE ADDRESS | A | SUBADDRESS | A | DATA | A | P |
|---|---------------|---|------------|---|------|---|---|

S = start condition
 SLAVE ADDRESS = 1000 0000
 A = acknowledge, generated by the slave

SUBADDRESS = see Table 1
 DATA = see Table 1
 P = STOP condition

If more than 1 byte of DATA is transmitted, then auto-increment of the subaddress is performed.
