

HD26C32A

Quadruple Differential Line Drivers With 3 State Outputs

REJ03D0293-0200Z
(Previous ADE-205-575 (Z))
Rev.2.00
Jul.16.2004

Description

The HD26C32A provides differential line receivers which realize low power dissipation by CMOS process. The device has four receivers which meet the requirements of EIA standard RS-422A and RS-423A in a 16 pin package.

The enable function is common to all four receivers and offers a choice of active high or active low inputs. Fail safe design ensures that if the inputs are open the outputs will always be high.

Features

- Low power dissipation with CMOS process
- Meets EIA standard RS-422A/423A
- Input sensitivity: $\pm 0.2V$ (In the range of $\pm 7V$ of common mode input voltage)
- Propagation delay time: 19 ns typ
- Input hysteresis width: 60 mV typ
- Three state outputs
- Differential Inputs are includes fail safe circuit
- Power up and power down protection
- Pin to pin compatible with HD26LS32/32A
- Ordering Information

Part Name	Package Type	Package Code	Package Abbreviation	Taping Abbreviation (Quantity)
HD26C32AP	DILP-16 pin (JEITA)	DP-16E, -16FV	P	—
HD26C32AFPEL	SOP-16 pin (JEITA)	FP-16DAV	FP	EL (2,000 pcs/reel)

Note: Please consults the sales office for the above package availability.

Pin Arrangement

Function Table

Differential Input	Enable	$\overline{\text{Enable}}$	Outputs
$V_{ID} \geq V_{TH}$ or OPEN	H	X	H
	X	L	
$V_{TL} < V_{ID} < V_{TH}$	H	X	?
	X	L	
$V_{ID} \geq V_{TH}$	H	X	L
	X	L	
X	L	H	Z

H : High level

L : Low level

Z : High impedance

X : Irrelevant

? : Indeterminate

Absolute Maximum Ratings (Ta = 25°C)

Item	Symbol	Ratings	Unit
Supply Voltage*2	V_{CC}	7	V
Common Mode Input Voltage	V_{CM}	± 14	V
Differential Input Voltage*3	V_{DIFF}	± 14	V
Enable Input Voltage	V_{IN}	7	V
Output Current	I_O	± 25	mA
Storage Temperature	Tstg	-65 to +150	°C

Notes: 1. The absolute maximum ratings are values which must not individually be exceeded, and furthermore, no two of which may be realized at the same time.

2. All voltage values except for differential input voltage are with respect to network ground terminal.

3. Differential input voltage is measured at the noninverting input with respect to the corresponding inverting input.

Recommended Operating Conditions ($T_a = -40^{\circ}\text{C}$ to $+85^{\circ}\text{C}$)

Item	Symbol	Min	Typ	Max	Unit
Supply Voltage	V_{CC}	4.5	5.0	5.5	V
Common Mode Input Voltage	V_{CM}	—	—	± 7	V
Differential Input Voltage	V_{DIFF}	—	—	± 7	V
Output Current	I_O	—	—	± 6	mA
Operating Temperature	T_{opr}	-40	—	85	$^{\circ}\text{C}$
Enable Input Rise / Fall Time	t_r, t_f	—	—	500	ns

Note: 1. This item guarantees maximum limit when one input switches.

Waveform: Refer to test circuit of switching characteristics.

HD26C32A Line Receiver Applications

The HD26C32A is a line receiver that meets the EIA RS-422A and RS-423A conditions. It has a high in-phase input voltage range, both positive and negative, enabling highly reliable transmission to be performed even in noisy environments.

Its main features are listed below.

- Operates on a single 5 V power supply.
- ± 0.2 V input sensitivity in in-phase input voltage ± 7 V range
- Three-state output
- On-chip input fail-safe circuit
- On-chip power up/down protection circuit

As shown by the logic diagram, the enable function is common to all four drivers, and either active-high or active-low input can be selected.

When exchange is carried out using a party line system, it is better to keep the receiver input bias current constituting the driver load small, as this allows more receivers to be connected.

Figure 1 Differential Input Voltage vs. Output Voltage Characteristics

Figure 2 Input Voltage vs. Input Current Characteristics

Figure 3 Method of Enhancing Fail-Safe Function

Figure 4 R_1 , R_2 vs. Differential Input Voltage

1. Unidirectional Transmission (1 : 1 Configuration)

Figure 5 1 : 1 Unidirectional Transmission

Figure 6 Sample Transmission Waveforms

2. Unidirectional Transmission (1 : n Configuration)

Figure 7 1:n Unidirectional Transmission

With this connection method, n receivers are connected for one driver. In the RS-422A standard, ten receivers can be connected simultaneously for one driver.

Conversely, it is also possible to connect one receiver for n drivers.

3. Bidirectional Transmission

Figure 8 Bidirectional Transmission

When bidirectional data exchange is performed using a combination of the HD26C31 and HD26C32A, since either high or low output control is possible, using complementary enable inputs for the driver and receiver makes it easy to configure the kind of combination illustrated in figure 8.

Extending this combination makes it possible to exchange n-bit data simultaneously, and handle a party line system.

Package Dimensions

As of January, 2003
Unit: mm

Package Code	DP-16E
JEDEC	Conforms
JEITA	Conforms
Mass (reference value)	1.05 g

Keep safety first in your circuit designs!

1. Renesas Technology Corp. puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage. Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of nonflammable material or (iii) prevention against any malfunction or mishap.

Notes regarding these materials

1. These materials are intended as a reference to assist our customers in the selection of the Renesas Technology Corp. product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Renesas Technology Corp. or a third party.
2. Renesas Technology Corp. assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.
3. All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Renesas Technology Corp. without notice due to product improvements or other reasons. It is therefore recommended that customers contact Renesas Technology Corp. or an authorized Renesas Technology Corp. product distributor for the latest product information before purchasing a product listed herein.
