

3. TELECOMMUNICATION APPLICATION

1.1 Telephone Application Function

Application	Type	Package	Circuit Function
Tone Ringer	KA2410 KA2411	8DIP	- Adjustable warbling and 2 frequency tone - External triggering or ringer disable (KA2410) - Adjustable supply initiating current (KA2411) - Built-in hysteresis
Tone Ringer with Bridge Rectifier	KA2418B/28B	8 DIP	- Protect against over voltage - Low current consumption - Allow the parallel operation of 4 devices - Built-in hysteresis - External component's are minimized - High output voltage
DTMF/ Pulse Switchable Dialer	KS58006	1 8 DIP/20 SOP	- Tone/Pulse switchable dialing, touch key or slide switch 32 digit redialing & PABX auto-pause time - Make/break ratio selectable pin
	KS58008	18 DIP/20 DIP 22 DIP	- One touch redial operation - Hands free & Hold function operation - Tone/pulse switchable dialing, touch key or slide switch 32 digit redialing & PABX auto-pause time - Make/break ratio selectable pin
DTMF/ Pulse 3 No Emergency Dialer	KS58505	22 DIP	3 No × 16 digit memory & 32 digit redial - Including PABX auto-pause time - Make/break ratio selectable pin - On/Off hook memory - Tone/pulse switchable dialing, touch key or slide switch
DTMF/ Pulse Switchable 10 No Memory	KS58550	22 DIP	10 No × 16 digit memory & 32 digit redial - Including PABX auto-pause time - Make/break ratio selectable pin - Flash time selectable pin
