

Key features

- high reliability
- attractively priced
- small size - 4.5 x 3.2mm
- temperature range -20°C to +100°C
- taped to IEC 286 Pt 3
- suitable for dip and wave solder
- insulation 1000MΩ Min
- available from stock

SMD Inductors

Specification

Electrical - 3613A

Inductance Code	Nominal Inductance (μ H)	Inductance Tolerance (± %)	Q (Min)	Self Resonance Frequency (MHz) (Min)	DC Resistance (Ω Max)	DC Current (mA)	Measuring Frequency (MHz)

type 3613 series

Specially developed for automatic mounting applications, this exciting range of chip inductors is a ferrite based product sealed in a thermoset plastic body. It employs solder coated copper terminations, with a barrier layer. Its smooth top surface makes it particularly well suited to pick and place equipment.

18:12 moulded chip winding

SMD Inductors

type 3613 series

The 3613C now has an extended temperature range of -20°C to +100°C, and is offered down to 5% tolerance, in values over 100 μ H. This is truly the last word in 1812 chip inductors.

Environmental

Insulation: 1000 Meg ohms
Temperature Range (3613A): -25°C to +85°C
Temperature Range (3613C): -20°C to +100°C

Dimensions

How To Order

3613	A	1R5	M
Common Part	Standard Part	Inductance Value	Tolerance
3613 - 18:12 Size	A - Standard Part C - Extended Tolerance/ Temperature Range	Value Code (See Table)	M - $\pm$ 20% K - $\pm$ 10% J - $\pm$ 5%

Packaging:
500 Pieces (7" Reel)
