

5 AMP POSITIVE VOLTAGE REGULATOR

FEATURES

- Low Dropout Performance
- Fixed or Adjustable Voltages
- Fixed Output Voltages of 3.3V, 5V & 12V
- Adjustable Output Voltage Range From 1.2V
- Line Regulation 0.015% / V Typical.
- Load Regulation 0.01% Typical.
- Available in Hermetically Sealed TO-3, SMD1 and TO-257 (isolated & non-isolated) Packages.
- Military Temperature Range (-55 to +150°C)

DESCRIPTION

The LT1084 voltage regulators are monolithic integrated circuits designed for use in applications requiring a well regulated positive output voltage with low input-output differential voltage.

Features include full power usage of up to 5A load current, internal current limiting and thermal shutdown. Safe area protection on the die is also included, providing protection of the series pass Darlington transistor under most conditions.

The hermetically sealed TO-3 packages are utilised for high reliability and low thermal resistance, whilst the SMD1 package is designed for surface mount applications.

ABSOLUTE MAXIMUM RATINGS (T_{case} = 25°C unless otherwise stated)

V _{IN}	Input – Output Voltage Differential			35V
P _D	Power Dissipation			Internally limited *
R _{θJC}	Thermal Resistance Junction To Case	TO-3	Control	0.76°C / W
		TO-3	Power	2.3°C / W
R _{θJC}	Thermal Resistance Junction To Case	SMD1	Control	0.79°C / W
		SMD1	Power	4.0°C / W
R _{θJC}	Thermal Resistance Junction To Case	TO-257	Control	0.79°C / W
		TO-257	Power	4.0°C / W
T _J	Operating Junction Temperature Range		Control	-55 to 150°C
			Power	-55 to 200°C
T _{STG}	Storage Temperature Range			-65 to 150°C
T _{LEAD}	Lead Temperature (for 10 sec.)			300°C

* These ratings are only applicable for power dissipations of 30 Watts over a limited range of V_{IN} – V_{OUT}.
