

Part No. M830320 Wi-Fi / BT / Zigbee Ceramic Antenna

2.4 GHz

Supports: Wi-Fi applications, Agriculture, Automotive, Bluetooth, Zigbee, WLAN, Smart Home, Healthcare, Digital Signage

KYOCERA AVX's series of Ceramic Isolated Magnetic Dipole™ (IMD) antennas deliver on the key needs of device designers for higher functionality and performance in smaller/thinner designs. These innovative antennas provide compelling advantages for Bluetooth® enabled mobile devices.

Real-World Performance and Implementation

Ceramic antennas may look alike on the outside, but the important difference is inside. Other antennas may contain simple PiFA or monopole designs that interact with their surroundings, complicating layout and compromising performance. Ethertronics antennas utilize patented IMD technology to deliver optimum performance in a miniature size configuration.

Greater Flexibility

KYOCERA AVX's first-in-class IMD technology enables you to develop designs that are more advanced and that deliver superior performance in reception critical applications.

Electrical Specifications

Typical performance on a 40 x 60 mm PCB

Frequency (MHz)	2400 – 2485
Peak Gain	1.8 dBi
Average Efficiency	72%
VSWR Match	2.0:1 max
Feed Point Impedance	50 ohms unbalanced
Polarization	Linear
Power Handling	0.5 Watt CW

Mechanical Specifications & Ordering Part Number

Ordering Part Number	M830320
Size (mm)	8.0 x 3.0 x 1.3
Mounting	Surface mounted
Weight (grams)	0.2
Packaging	Tape & Reel, M830320 – 1,000 pieces per reel
Demo Board	M830320-01

Ceramic Wi-Fi / Bluetooth Antenna

2400 – 2485 MHz

KEY BENEFITS

Stay-in-Tune

IMD antenna technology provides superior RF field containment, resulting in less interaction with surrounding components.

Quicker Time-to-Market

By optimizing antenna size, performance and emissions, customer and regulatory specifications are more easily met.

Reliability

Products are the latest RoHS version compliant.

APPLICATIONS

- Embedded design
- Cellular, Headsets, Tablets
- Gateway, Access Point
- Handheld
- Telematics
- Tracking
- Healthcare
- M2M, Industrial devices
- Smart Grid
- OBD-II

2.4 GHz KYOCERA AVX's Embedded Antenna Specifications
 KYOCERA AVX produces a wide variety of standard and custom antennas to meet user needs.

 KYOCERA AVX produces a wide variety of standard and custom antennas to meet user needs.

Antenna Layout

Typical layout dimensions (mm)

- Additional VIAS: Diam. 0.2mm to be placed around antenna, (no vias on transmission lines).
- Via holes must be covered by solder mask

Antenna Layout Tips (General reference)

Important, layout guidelines for correct operation of KYOCERA AVX Ceramic Antennas. Please read guidelines below before laying out the antenna in a device. Figure 1 shows the typical antenna layout. Figure 2 shows Ethertronics' antenna layout.

Shorting pin Feed pin
 Antenna tuning loop:
 Figure 1
 Typical Antenna Layout

Shorting pin and feed pin are shared in
 KYOCERA AVX ceramic antennas

Figure 2
 KYOCERA AVX Antenna
 Layout (Required)

- The antenna tuning loop is formed by the PCB layout.
- The feed pin and shorting pin are combined because it requires very close proximity to achieve more band- width.
