SMD Chip Inductor TYPE 3611 SERIES

The very latest miniature wound inductors with a wide inductance and temperature range are supplied on 8mm wide tape and reeled in 2000 pieces. They are 1008 size inductors for automatic placement. These tiny 10.08 size inductors are wound on a ferrite bobbin core and encapsulated in a moulded epoxy resin and can be soldered and cleaned using all popular methods.

MEGGITT CITEC KEY FEATURES

- HIGH RELIABILITY
- ATTRACTIVELY PRICED
- SMALL SIZE - 2.5 x 2.0MM (1008)
- TEMPERATURE RANGE -20°C to +100°C
- TAPED TO IEC 286 Pt3
- SUITABLE FOR DIP AND WAVE SOLDER
- INDUCTANCE OF 0.01μH to 100μH
- SUPERIOR Q CHARACTERISTICS

ELECTRICAL ~ STYLE T (STANDARD)

This publication is issued to provide outline information only and (unless specifically agreed to the contrary by the Company in writing) is not to form part of any order or be regarded as a representation relating to the products or service concerned. We reserve the right to alter without notice the specification, design, price or conditions of supply of any product or service. Whilst Meggitt Electronic Components products are of the very highest quality and reliability, all electronic components can occasionally be subject to failure. Where failure of a Meggitt Electronic Components product could result in life threatening consequences, then the circuit and application must be discussed with the Company. Such areas might include ECG, respiratory, and other medical and nuclear applications and any non fail safe applications circuit.
