# PA0201/0402/0603/0805/1206/2010

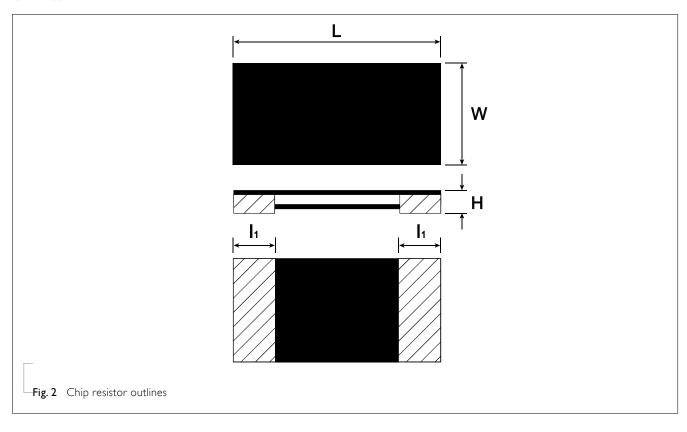

# **CONSTRUCTION**

The resistors are constructed using outstanding TCR level material, which makes Yageo PA resistors excellent for current sensing application in battery charger circuit & DC-DC converter.

РΑ

The composition of the resistive material is adjusted to give the approximate required resistance. Finally, the three external terminations (Cu / Ni / matte Tin) are added, as shown in Fig. 2.
