TUSONIX

528 Series Trimmer Capacitor

Features of the 528 Trimmer

Incorporating the same fine design features that have made the 538 Series standard for the industry, TUSONIX' 528 Series featured here is miniaturized for today's circuitry. All ceramic construction with optically flat interfaces provides tuning, smoothness not obtainable with compression type trimmers. The silver electrodes are intimately bonded to the top surfaces of the base and rotor. The terminals and other metal parts are nonferrous and silver-plated for good conductivity and trouble free soldering.

A variety of capacitance ranges, terminations and mounting provisions make these popular trimmers ideal for nearly all applications.
