
HD64570/HD64572

SCA Series (SCA-I SCA-II)

HITACHI

Description

The SCA Series of devices converts parallel data to serial data, and serial data to parallel data for communication with other devices. The HD64570 and HD64572 Serial Communications Adapter (SCA-I and SCA-II, respectively) peripheral chips enable a host microprocessor to perform asynchronous, byte synchronous, or bit synchronous serial communication. The SCA-II can also perform transparent communication.

Both chips have two independent full-duplex, multiprotocol serial channels that support a wide variety of communications protocols such as frame relay, HDLC, SDLC^a, X.25, LAPB, LAPD, mono sync, bisync, X.21, DDCMP, asynch, etc. Both chips also include a built-in direct memory access controller (DMAC) with deep FIFOs that can execute chained-block transfers, enabling high-speed transfers of data between an SCA device and memory. Due to the on-chip DMAC, the SCA Series can support very high data rates without monopolizing the bus, even in full-duplex communication. Other on-chip features of the SCA Series include direct MPU interfaces, a bus arbiter, timers, and an interrupt controller.

Highly optimized, the SCA Series of devices are used in a large number of datacommunication and networking applications such as bridges, routers, multiplexers, switches, frame relay exchanges, broad band and Internet access products, LAN/WAN interface cards, T1/E1 applications, fractional T3 applications, protocol converters, repeaters, frame relay over ATM applications, remote access LAN products, etc.

SDLC^a is a trademark of International Business Machines (IBM).

Performance (Data Transfer Rate)

Transmission Error Detection:

- Parity (asynchronous), CRC-16, CRC-CCITT (byte and bit synchronous)

Transmission Codes:

- NRZ, NRZI, FM0, FM1, Manchester

Operating Modes:

- Normal operating mode (full-duplex), auto echo, local loop back

DMA Transfer:

- On-chip DMAC with four channels and single/chained-block transfer capability
- DMA transfer rate (max.) at 10 MHz: 11.1 MBytes/sec
- DMA transfer rate (max.) at 16.7 MHz:
18.4 MBytes/sec

Address Space:

- 16 MBytes

MPU Bus Interface:

- Connects to 64180, 80x86, and 680x0 systems;
8/16-bit MPU systems

Timers:

- On-chip timers with four 16-bit channels
- Time-out detection, etc.

Power Supply:

- 5V +/- 10% (-20°C to +75°C) for the 10 MHz chip
- 5V +/- 5% (0 to +70°C) for the 16.7 MHz chip

Process Technology:

- 1.0µm CMOS

HD64570/HD64572

Packaging:

- 84-pin PLCC (CP-84)
- 88-pin QFP (FP-88)

SCA-II (HD64572) Features:

Data Transfer Rate:

- 50 bits/sec to 25 Mbits/sec ($f = 33.3 \text{ MHz}$)
- 50 bits/sec to 30 Mbits/sec ($f = 33.3 \text{ MHz}$, the high-speed version)

Data and Address Bus Widths:

- Data bus: 32-bit
- Address bus: 32-bit

Protocol Support:

- Asynchronous (ASYNC): 5 to 8 bits + parity (odd, even, or none)
- Byte Synchronous (COP): mono synch, bisynch, X.21, DDCMP, external sync modes, etc.
- Bit Synchronous (BOP): frame relay, HDLC, SDLC^a, X.25 link level (LAPB), LAPD, BOP loop, etc.
- Transparent: T-1 multiplexer, ATM

Highly Efficient Data Transfer:

- Two 64-byte FIFOs (transmit/receive) per channel

Transmission Error Detection:

- Parity (asynchronous), CRC-16, CRC-CCITT, CRC-32 (byte and bit synchronous)

HD64570/HD64572

Transmission Codes:

- NRZ, NRZI, NRZI (IEEE), FM0, FM1, Manchester

Operating Modes:

- Normal operating mode (full-duplex), auto echo, local loop back (two types)

DMA Transfer:

- On-chip DMAC with four channels and single/chained-block transfer capability
- DMA transfer rate (max.) at 33.3 MHz: 66.6 MBytes/sec

Address Space:

- 4 GBytes

MPU Bus Interface:

- Connects to 80x86 (two types*), 680x0, and RISC systems; 32-bit MPU systems

* Note: The SCA-IIÖs 8086 bus interface control signals correspond to those of the 8086 CPU, but both the address bus and the data bus are 32-bits wide.

Timers/Counters:

- On-chip timers with four 16-bit channels
- Time-out detection, etc.
- Count occurrences of various kinds of MSCI status (interrupt sources)
- Count EOMs and transmission errors detected (underrun frames, overrun frames, CRC error frames, etc.)

Power Supply:

- 5V +/- 5% (-20°C to +75°C)

Process Technology:

- 0.6µm CMOS

Packaging:

- 176-pin LQFP (FP-176)

Literature

SCA-I (HD64570) User's Manual: PMHKSTH001D2

- Includes User's Manual, Application Note and Technical Q&A
