

MI-200TM

Military High-Density
DC-DC Converters
50 to 100W

Product Highlights

The MI Series is designed for Military applications and is based on Vicor's second generation family of zero-current-switching, component level DC-DC converters. Operating at frequencies in excess of 1MHz, the MI Series offers state-of-the-art performance in terms of power density, efficiency, noise, ease of use, and reliability.

All units are manufactured under a quality system approved to MIL-I-45208 and in ISO 9001-registered facilities. Full epoxy encapsulation in Vicor's industry standard package enables the MI Series to meet MIL-STD-810 environmental requirements for humidity, fungus, salt fog, explosive atmosphere, acceleration, vibration, and shock. (See page 21.)

Standard features such as wide output trimming/programming, current limiting, remote sense, output inhibit and latching OVP and OTP combine to offer a high degree of protection, versatility and reliability for military power systems.

Features:

- Inputs:
28Vdc per MIL-STD-704D/E
155Vdc per DOD-STD-1399A
270Vdc per MIL-STD-704D/E
- Single Output: 1 to 95Vdc
- Up to 23 W/in³
- MIL-STD-810 Environments
- 80-90% Efficiency
- Remote Sense
- Current Limit
- OVP and Thermal Shutdown
- Power Boosters for Higher Power Outputs
- ZCS Power Architecture
- Low Noise FM Control

Converter/Booster Specifications
