Description

CD4095BMS and CD4096BMS are J-K Master-Slave Flip-Flops featuring separate AND gating of multiple J and K inputs. The gated J-K inputs control transfer of information into the master section during clocked operation. Information on the J-K inputs is transferred to the Q and \bar{Q} outputs on the positive edge of the clock pulse. SET and RESET inputs (active high) are provided for asynchronous operation.

The CD4095BMS and CD4096BMS are supplied in these 14 lead outline packages:

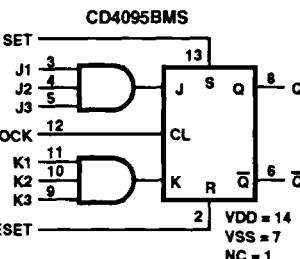

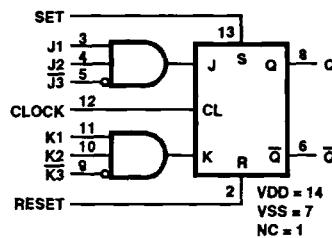

Braze Seal DIP H4Q
 Frit Seal DIP H1A
