— 体積比約 50% (HSJ0861 比) の小形、薄形タイプ—  
 超薄形、小形で回路構成はフルチョイスが可能です。ボディを上げ底構成とし、フラックス流入防止の向上と密閉化を計っています。

— Small thin type, about 50% in volume  
 (compared with HSJ0861) —  
 It is extra-thin and compact, and allows full choice of circuit configuration. The housing is a raised bottom structure so that flux inflow can be effectively prevented.
