

Description

The 1.6/5.6 series is a European design with two coupling versions: Threaded provides positive mating, Push-pull allows quick installation. Amphenol 1.6/5.6 coaxial connectors are miniature 75 ohm units operating from 0-1GHz.

The compact design of the 1.6/5.6 permits dense connector packing making these connectors ideally suited to applications where space limitation is a factor.

This series complies with DIN 47295, DIN 41626, DIN 47297, NFC 93-569, NFC 93-570, IEC 169-13, and the CECC 22230 standards.

For crimping the inner contact please use our standard tool M22520/2-01 and locator AC-Positioner K41.

Features/Benefits

- Meets IEC 169-13, DIN 47295 and NFC 93-570 international specifications designed for SMT.
- Plugs and bulkhead jacks are available in crimp-crimp termination versions to ensure high reliability in connector assembly and a lower cost installation method.
- Threaded coupling designed for quick connect/disconnect allows safe coupling.

Applications

- Base Stations
- Cable Assemblies
- Computer / LAN
- Routers
- Switching Equipment
- Telecom
- Wireless

1.6/5.6 Coaxial Connectors

Specifications

Electrical

Impedance	75 Ω
Frequency range	0-1 GHz
Voltage rating	330 volt peak
Contact resistance:	
Center contact	4 milliohm
Outer contact	2 milliohm
Insulation resistance:	10,000 MΩ

Mechanical

Mating	M9 x 0.5 threaded coupling
Cable affixment	(center conductor)
Crimp or solder	Captivated contacts
All crimps	

Material

Contacts	Male: Brass Female: (center and outer) Beryllium copper. Gold plated
Other metal parts	Brass, nickel plated
Insulators	Teflon
Crimp ferrule	Copper

Environmental

Temperature Range	- 40°C to +155°C
Connector Durability	500 matings

Note: These characteristics are typical but may not apply to all connectors.

Plug

Jack
