

GENERAL DESCRIPTION: 32-BIT 74181 TYPE ALU, USING CARRY SELECT ADDER

CFT1813B has logic functions and arithmetic operations which are fully compatible with TI74181 ALU except that the A=B output(the detail information about A=B is on the bottom of this file).

PIN CONNECTION DIAGRAM:**FEATURES:**

- Uses carry select
- Arithmetic operating modes: Addition, Subtraction, Shift operand A one position, Magnitude comparison operations, plus twelve other arithmetic operations
- Logic function modes: Exclusive-OR, Comparator, AND, NAND, OR, NOR, plus ten other logic operations

EQUIVALENT USED GATES: 1339 GATES
(for rough area estimates)

THIS MEGAFUNCTION CONSISTS OF :
1339 soft-coded gates.

POWER: NOT AVAILABLE.

FAULT COVERAGE(%): 100%

This megafunction was designed to be 100% functionally compatible as specified in the vendor's data book. However, LSI LOGIC makes no warranty that this megafunction behaves identically to the standard part. It is the user's responsibility to assure that the megafunction operates correctly in his/her ASIC design and meets desired system requirements.

PIN DESCRIPTION:

S3:0 FUNCTION SELECT LINES.
 A31:0 A OPERAND.
 B31:0 B OPERAND.
 CIN CARRY-IN.
 M MODE SELECT LINE.
 CO CARRY-OUT.
 FN31:0 FUNCTION OUTPUTS.
 AEB A OPERAND EQUALS B OPERAND.

AC CHARACTERISTICS:

(Nominal case, output loading is 2, delay predicted by LPACE)

FROM	TO	10K TYPICAL DELAY (NS)	LCA100K TYPICAL DELAY (NS)

ANYA	FN	5.7	4.5
ANYB	FN	6.3	5
ANYS	FN	7.7	5.7

CFT1813B**ALU****CFT1813B**

In TI74181, "A=B" is valid when the ALU is in subtract mode with CIN=H. This is because if A and B are equal, A-B will be Zero and "A=B" pin will become true. This algorithm uses the ALU and it is slow. CFT1814A doesn't use the ALU to generate the "A=B" signal, instead it is generate from the output of encoder circuitry. As a result, it is faster, The following is a table showing the difference between TI74181 and CFT1814A.

CIN S3 S2 S1 S0	TI74181 A=B output	CFT1814A A=B output
H L H H L	A=B	A=B
L L H H L	A=B-1	A=B
all others	functions not the same as A=B	functions not the same as A=B and not the same as TI74181
