050-117 PRODUCT BRIEF

Line Replaceable Unit (LRU) Media Converter, Flange Mount
10/100/1000BASE-T to Fiber Optic Ethernet (SX, LX10 or FX)

10/100/1000BASE-T to 1000BASE-SX or 1000BASE-LX10

The Glenair 050-117 Flange Mount Copper to Fiber Media Converter can be configured as either Single Channel or Dual Channel and can convert 10/100/1000BASE-T to 1000BASE-SX, 1000BASE-LX or 100BASE-FX protocols. It is designed for harsh environments and incorporates electronics in an environmentally sealed enclosure that incorporates three environmental M38999 connectors. The power supply is designed to accept a wide DC input voltage range, 18V to 36V and dirty 28V power as defined in DO-160. Power is supplied through a 38999 with standard #22D contacts. Signal I/O passes through a 38999 with a combination of Quadrax and #22D contacts and Fiber Optics passes through a 38999 using ARINC 801 contacts which can be configured to support either single mode or multi-mode fiber applications.

Flow Control

Ethernet flow control is a mechanism for temporarily stopping the transmission of data on Ethernet computer networks. If data flow between the two devices connected to the media converter will vary in rate, it is up to the end user to ensure their higher speed devices are throttled correctly to ensure loss of data does not occur over time. Flow control can be enabled at the factory if so desired. Contact the factory for more details.
