

The New Generation group of connectors includes fibre optics in the series B which can be used in a wide range of applications including communications and medical instruments.

This multimode fibre optic system is available for single fibres in the series 0B and for multifibre cables or mixed fibre optic/electric (high and low voltage and coaxial) contacts in the series 2B, 3B, 4B and 5B, as well as elements for electro-optic emitters and detectors.

Characterized by a termination method of polishing with epoxy, these fibre optic connectors are adapted to the most used types of multimode fibres. The fixed sockets for TO-18 shells are available fitted with emitters (LED IR Ga As or IR (GaAl) As) or photodiode detectors (Si-PIN) which permit connections up to 3 kilometers with a transmission band of 20 MHz. These connectors can also be ordered without these elements.

The guide on the outer shell eliminates alignment errors which ensures excellent mating repeatability.

Mixed connectors combining fiber optic and signal contacts are also available. Please see LEMO's B/S series catalog for more information.

Model description

Single fibre

- FGG** Straight plug with key (G) and cable collet
PCG Fixed socket, short model, two nuts and cable collet (back panel mounting) with key (G).
PFG Fixed socket, nut fixing, with key (G) and cable collet (back panel mounting).
PHG Free socket with key (G) and cable collet

Multifibre and Mixed

- EGG** Fixed socket, nut fixing, with key (G) or keys (code A...L)
FGG Straight plug with key (G) or keys (code A...M) and cable collet
PFG Fixed socket, two nuts with key (G) or keys (code A...L) and cable collet (back panel mounting)
PHG Fixed socket with key (G) or keys (code A...L) and cable collet
PKG Fixed socket, nut fixing, with key (G) or keys (code A...L) and cable collet

Electro - Optical Components

- EEG** Fixed socket, nut fixing (back panel mounting) with key (G).
EGG Fixed socket, nut fixing, with key (G)

Part section showing internal components of a fibre optic contact

Female contact

- 1 alignment tube
- 2 alignment ferrule
- 3 crimp back nut
- 4 clip
- 5 crimp ferrule

Male contact

- 1 outer shell
- 2 alignment ferrule
- 3 crimp back nut
- 4 sprung sleeve
- 5 spring
- 6 clip
- 7 crimp ferrule

Technical characteristics

Material and treatment

Component	Material (standard)	Surface treat (µm)		
		Cu	Ni	Cr
Outer shell and collet nut	Brass (ASTM C 385)	0.5	3	0.3
Latching sleeve	Special Brass	0.5	3	
Spring	Stainless steel	no treatment		
Alignment ferrule	CuNiZn alloy	no treatment		
Alignment sleeve	CuNiZn alloy	no treatment		
	PEEK (MIL-P-46183)	no treatment		
Crimp ferrule	Brass (ASTM C 345)	0.5	3	
Locking washer	Bronze (ASTM C 521)	0.5	3	
Other metallic parts	Brass (ASTM C 385)	0.5	3	
Strain relief	Polyurethane			

Surface treatment standards are as follows:

- Nickel FS-QQ-N-290A
- Chrome FS-QQ-C-320B

Mechanical and climatical

Characteristics	Value	Standard	Method
Cable retention force	>100 N	MIL-STD-1344A	2009.1
Endurance	> 500 cycles	MIL-STD-1344A	2016
Fibre diameter	125 µm min.		
Temperature range	- 20°C + 80 °C (- 2°F + 176°F) *		
1N = 0.102 kg		* Based on epoxy to be used	

* Based on epoxy to be used.

Optical

Characteristics	Value
Insertion loss ¹⁾	< 1.5 dB
Repeatability	better than ± 0.2 dB

1) Depends on fibre type

Part number examples

Single Fiber

FGG 0B 051 C A B E 30

Variant ¹⁾

Model: page 3

Series: 0B

Type: page 3

Housing:
C=chrome plated brass

Alignment termination:
A=CuNiZn alloy

øCrimp ferrule

30= ø 2.5 à 3.5 mm

35= ø 3.5 à 4.0 mm

45= ø 4.0 à 4.5 mm

Cable fixing Type:

E=crimp

Contact Type:

B=male

S=female

FGG.0B.051.CABE30R Straight plug with key (G) and cable collet, series 0B, single fibre for a silica/silica (50/125µm) fibre type, chrome plated brass housing, CuNiZn alloy alignment termination, male contact, for crimping to a cable with an OD ranging from 2.5 to 3.5 mm, red strain relief.

Note:

1) The bend reliefs are available in nine colors. The relationship between part number letter and color is to be found in the 'Accessories' section.

Multifiber and Mixed

PKG 3B 97C C 4 M D 92

Variant ¹⁾

Model: page 3

Cable fixing Type:

D = Cable colletcrimp

Contact Type: page 4

PKG.3B.97C.C4MD92 Fixed socket, nut fixing, with key (G) and cable collet, series 3B, mixed type with 2 optical fibres and 4 low voltage contacts, chrome plated brass housing, female fibre optic contacts for HCS (200/230µm) type fibre, and female crimp low voltage contacts, type D collet of 9.2 mm diameter.

Note:

1) The plugs and sockets with cable collet can be supplied with a collet nut for fitting a cable bend relief. For ordering add a 'Z' in the variant position of the part number and order the bend relief separately as explained in the 'Accessories' section.

Electro-optical components

EGG 0B 061 C L S

Contact Type:

B = male

S = female

Model: page 3

Series: 0B

Type: page 3

Alignment termination:
L = PEEK

Housing:

C = Chrome plated brass

EGG.0B.061.CLS Fixed socket, nut fixing, with key (G), series 0B fitted with a IR (GaAl) As LED, chrome plated brass housing, PEEK alignment termination, female contact.

- 1) The 0B connectors with cable collet are always delivered with a strain relief. The colour of which is to be specified in the 'variant' position of the part number
- 2) The part number for this model in the series 0B is PCG. This model has been specially designed to have pig tails (back panel mounting)

On request the PFG model is also available in the 5B series
