

FiberINTERFACES

Product description

The following transmitter and receiver components are used in combination with the analog hybrids. A sharp knife is the only tool

required in order to fit them to the optical fiber cable. The fiber ends can be polished with abrasive paper to achieve better quality.

		SFH 20	OSFH 800	OPAH 800	OPAH 200	OPAH 200
LSTD-L-B (1A194A)	ST/BFOC	938 141-007

Product description

The Hirschmann OVK connectors series has been developed in order to preserve the cost advantages of plastic optical fibers used for short distances.

The low cost, robustness and extreme ease of installation are the outstanding advantages of this series.

	order no.	type
