Description

M/A-COM's DP52-0002 is an IC-based monolithic diplexer in a low cost SOIC-8 SMT plastic package. This diplexer is ideally suited for applications where small size, low insertion loss, superior repeatability and low cost are required. Typical applications include AMPS/PCS and GSM/DCS dual mode portable devices.

The DP52-0002 is fabricated using a passive-integrated circuit process. The process features full-chip passivation for increased performance and reliability.
