

Series TNC

Coaxial connector (Thread Navy Connector) with screw coupling for reliable connection and disconnection. Due to this mechanism, these connectors are particularly suitable for use in mobile devices with severe vibrations. The selected locking mechanism also achieves a higher safety class.

The TNC connector is available with characteristic impedances $Z = 50 \Omega$ and $Z = 75 \Omega$; both versions can be mated. The maximum frequency for the 50Ω version is 10 GHz, but the optimum working frequency is 0 to 4 GHz. The 75Ω version can be used successfully up to 1 GHz.

Straight and angled connector types are available for cables with diameters from 1.8 mm to 10.8 mm, in a variety of panel types and printed circuit board applications with various connection technologies.

TNC connectors have the same electrical interface dimensions as BNC series connectors.

Design in accordance with: IEC 169-8
MIL C-39012

Quality tested in accordance with: US MIL-Std 202

Cable mounting: clamp and crimp versions

Special versions: improved clamp
captivated center contact
gas-tight connectors

50 Ω and 75 Ω versions can be interconnected without restriction.

Serie TNC

Koaxial-Steckverbinder (Thread Navy Connector) mit Schraubverbindung für zuverlässiges Schließen bzw. Öffnen. Durch diese Schraubfesthaltung ist der TNC-Steckverbinder besonders für den Einsatz in mobilen Geräten, wo mit stärkeren Vibrationen zu rechnen ist, geeignet. Ebenfalls wird durch die gewählte Festhaltungsart ein höherer Schutzgrad erzielt.

Die Steckverbindung wird mit Wellenwiderständen von $Z = 50 \Omega$ oder $Z = 75 \Omega$ geliefert, die beiden Ausführungen sind steckkompatibel. Der Einsatzfrequenzbereich für die 50Ω -Variante reicht bis ca. 10 GHz, wobei optimale Ergebnisse zwischen 0 und 4 GHz erzielt werden können. Die 75Ω - Variante kann mit gutem Erfolg bis ca. 1 GHz eingesetzt werden.

Es existieren Bauformen in gerader und abgewinkelter Ausführung für Kabel mit Durchmessern von ca. 1,8mm bis 10,8mm, für Gehäuseeinbau und für Leiterplatteeinsatz mit verschiedenen Anschlußtechniken.

TNC-Stecker weisen die gleichen elektrischen Interfaceabmessungen wie BNC-Stecker auf.

Anschlußdimensionen nach: IEC 169-8
MIL C-39012

Qualitätsprüfung nach: US MIL-Std 202

Kabelmontage: Schraub- oder Crimpverbindung

Spezialausführungen: verbesserte Klemmung
festgehaltener Innenleiter
druckdichte Ausführung

50 Ω- und 75 Ω- Verbinder sind uneingeschränkt miteinander koppelbar.
