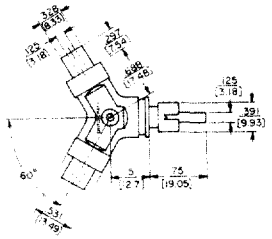
Y-CONNECTORS

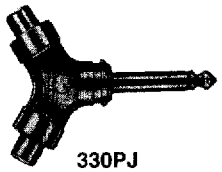
Fully shielded connectors make it possible to connect two cables (with standard microphone or phono connectors) in parallel to a single connector. Two inputs can be combined into a single output, or a single input can be split into two outputs.

Part Number 330F: Connects two cables with standard phono plugs (such as Switchcraft Number 3501M) in parallel to standard phono plug output.

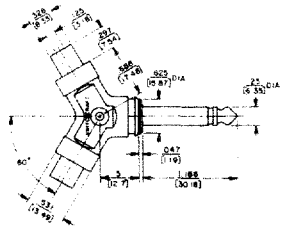
Part Number 330PJ: Connects two cables with standard phono plugs (such as Switchcraft Number 3501) in parallel to standard phone plug output.

330F





330PJ



Flexible "Y" connectors (phono jack and plug type). For converting stereo player to monaural. Can be used for a top-in meter monitor connection.

Part Number 330F1: Phono plug connected in parallel to 2 phono jacks. 4" long gray shielded cable.

Part Number 330F2: Phono plug connected in parallel to 1 phono jack and 1 phono plug. 4" long gray shielded cable.

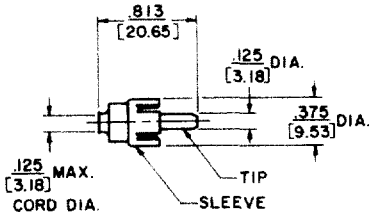
RF JACKS AND RF PLUGS

RF-PLUGS RF PHONO PLUGS

Coaxial phono connectors feature low-loss nylon insulation and are ideally suited to RF applications where semi-permanent connection of moderate power handling capability is required. Perfect for applications where space is at a premium and cost is important. RF-Jax® jacks and RF-Plug® plugs have been used successfully to 1kW at 30 MHz.

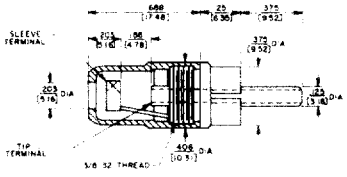
3504M 2-conductor phono plug. Mates with Number 3505F jack.

3504M



3507 2-conductor phono plug with nickel-plated copper alloy body and screw-on handle. Mates with No. 3505F jack.

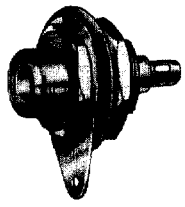
3507

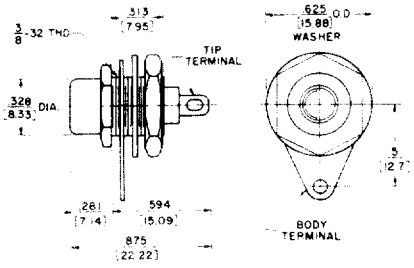


RF-JAX® RF PHONO JACKS

3505F 2-conductor phono jack for front-of-panel mounting. Fastens with 3/8-32 hex nut (supplied) to minimize tampering. Body has .438 inch (11.11 mm) hex shape on front, can be held conveniently with Spintite wrench while tightening locknut. Can be mounted on .688 inch (17.48 mm) centers, through a .391 inch (9.93 mm) diameter hole in panels up to .172 inches (4.37 mm) thick. Mates with Numbers 3504M and 3507 RF-Plug plugs.

3505F





DIMENSIONS ARE FOR REFERENCE ONLY Inch (mm)
